Benz builds the first 'Benz Patent Motorwagen' in Germany.

Cars And Transport

How has transport changed over time?

Key End Points

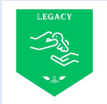

We use transport to travel from one place to another.

There are a variety of different types of transport that can be used to carry goods or people including vehicles, aircrafts, trains and ships.

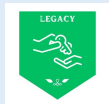

Timelines can be used to show where our learning sits in the past.

Horses and boats were some of the first types of transport and helped people to travel further than walking.

The first car was invented in 1769 and was powered by steam.

Karl Benz invented the first petrol car and it had three wheels.
